

Smarter Street Lights

BIG CONCEPT

A solution that addresses the
theme of Public Utility
benefiting society.

Smarter Street Lights

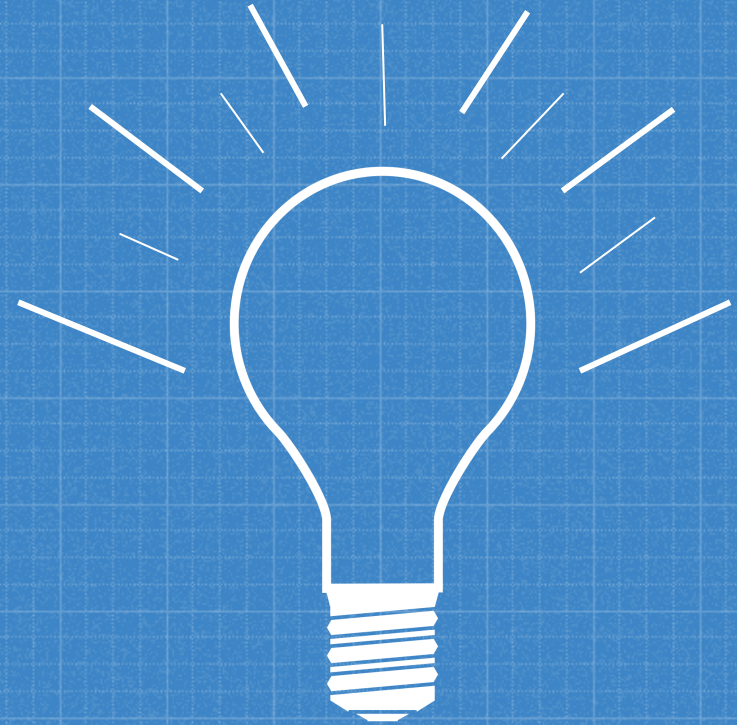

What Are Smarter Street Lights?

Purpose:

Automated
street lights
to save
electricity
and increase
the safety of
civilians

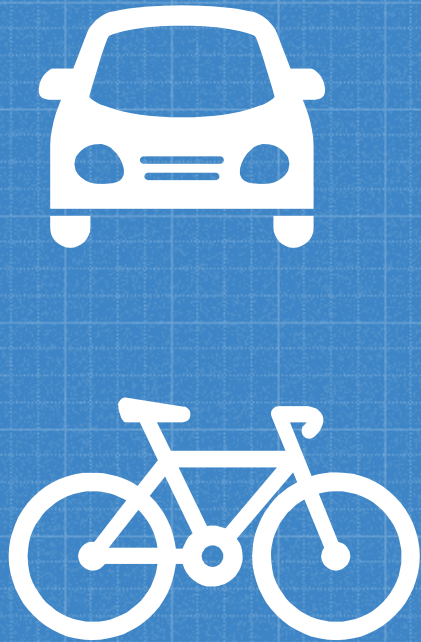

Features:

- Automated Street Lights
- Sonar
- Emergency Button

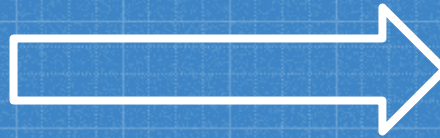

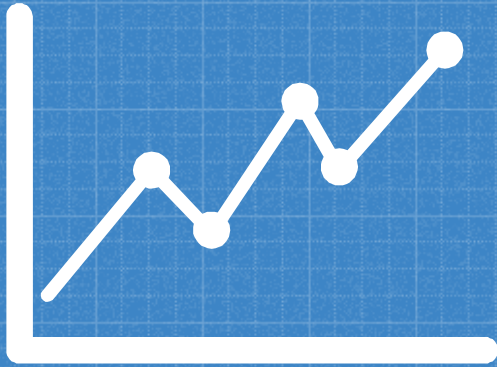

What Does It Do?

- First, street lamp detects pedestrians, bicyclists, and vehicles based off of their distance using sonar

How?

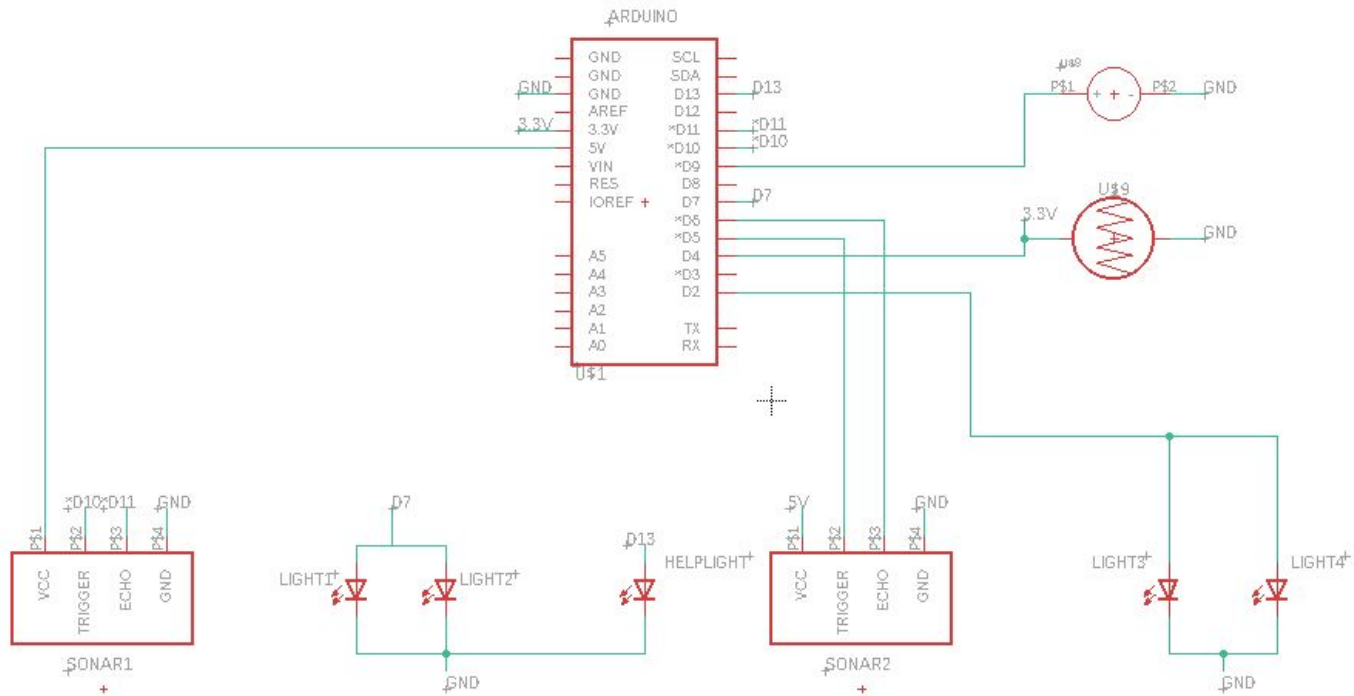

- Data collected from ultrasonic sensor determines how long the street light will remain on.

Another Feature

- Emergency button, when pushed, will sound an alarm.
